quently a whole season in advance of the styles usually found here, as the goods imported to this country are generally ordered the preceding March, and hence are necessarily of the previous Fall's Parisian styles. Hence, to avoid the annoyance of being always behind the fashions, while making a visit to Europe, I stopped a few weeks in Paris, and bought the above goods in person, from first hands. I hope the kind patronage of the Ladies will enable me to make a yearly trip to Paris, with the sole object of keeping pace with the Parisian fashions, and to have all new styles of goods here at the same time they appear upon the Paris

REMAINS OF A ROMAN CITY IN ENGLAND. We learn from the London Times, that the Duke of Cleveland, has let to the committee of excavations, four acres of ground at Wroxeter, the two on which the excavations have hitherto been carried on, and two additional acres adjoining, to be kept permanently open to the public and not to be filled up again .-Four acres of the buildings of a Roman town in Britain, ruined in the fifth century, will truly be an interesting monument. The recent excavation proves beyond a doubt that the whole mass of the ancient Roman city-that is, the floors and lower parts of the walls-exists under ground, and also that a better place could not have been chosen for excavating than that selected. The southern, and apparently the western limits of the great building containing the hypocausts, and believed to

very extensive parallelogram. DRINK OF SEA BIRDS-The question is often asked, where do sea birds obtain fresh water to slake their thirst, but we have never seen it satisfactorily answered till a few days ago. An old skipper with whom we were conversing on the subject, said that he had frequently seen these birds at sea, far from any land that could furnish them water, hovering around and under a storm cloud, chattering like ducks on a hot day at a pond, and drinking in the drops of rain as they fell. They will smell a rain squall a hundred miles or even further off, and scud for it with inconceivable fleetness. How long sea birds can live without water, is merely a matter of conjecture, but probably their powers of enduring thirst are increased by habit, and possibly they go without it for many days, if not for several weeks.

It is an error that Col. Lewis W. Washington, of Jefferson, is "the nearest relative of General Washington alive." The venerable Daingerfield Lewis, of King George, is one degree nearer. Mr. Lewis is a grandson of Fielding Lewis and Bettie, the sister of Washington, whilst Col. Washington's father, the late Col. Geo. C. Washington, was only the son of a nephew. All the nephews of the General were bequeathed swords in his will, and two are in the possession of the Lewis family, the one worn at Braddock's defeat, besides other relicts, being now at Marmion. Mrs. Lawrence Washington of Westmoreland, is an aunt of Col. L. W. Washington, and of course also "a nearer relative."-Fred. Recorder.

THE WORKING MEN .- "The mechanics." says Lord Byron, and "working classes who can maintain their families, are in my opinion, the happiest body of men. Poverty is wretchedness; but it is perhaps to be preferred to the heartless, unmeaning dissipation of the higher orders." A popular author says: "I have no propensity to envy any N. GUANO! GUANO!! GUANO!!! WE WOULD CALL THE ATTENTION OF GUANO Dealers, Planters, and Farmers, to the article which we have on hand, and for sale, at Thirty per cent. less than Peruvian Guano, and which we claim to be superior to any Guano or Fertilizer ever imported or manufactured in this country. This GUANO is imported by WM. II. WEED, of New York, from Jarvis' and Bakers' lands, in the "South Pacific Ocean," and is sold centine and pure as imported. It has been satisfactorily tested by many of our prominent Far-mers, and analyzed by the most eminent and popular Agricultural Chemists, and found to contain as will be seen by our circulars) a large per cent. of BONE PHOSPHATE OF LIME,

PHOSPHORIC ACID, And other animal organic matter, yielding ammo-nia sufficient to produce immediate abundant crops, besides substantially enriching the soil. It can be freely used without danger of burning the seed or plant by coming in contact with it, as is the ase with some other Fertilizers; retaining a great legree of moisture, it causes the plant to grow in
